## Short Summary

Reduce your travel time by up to 50% at half the cost

## Highlights

- **We have the knowledge to benefit all humanity**
- **Creating a more fulfilling peaceful life style**
- **Halving your utility bills**
- **Getting from A to B in half the normal time at half the cost**
- **Reducing your living expenses**

**Please note:** Investing in early stage businesses involves risks, including illiquidity, lack of dividends, loss of investment and dilution, and it should be done only as part of a diversified portfolio. This platform is

## Overview

Capital Needed	¥2,000,000
Minimum	¥100,000
Investment Raised	N/A
Previous Rounds	N/A
Stage	Pre-Startup/R&D
Investor Role	Any

targeted solely at investors who are sufficiently sophisticated to understand these risks and make their own investment decisions. This information has not been approved as a financial promotion, and you must carry out your own due diligence.

## The Business

We are engineers that have been designing building products in the electromechanical industry, and now because of what the market place is demanding I/we can utilize this knowledge to return high profit margins from producing products that are not ,CO2 carbon dioxide emitters,Eg one carbon atom, two oxygen atoms, this equates to 35 gigatons of carbon that is fed into the atmosphere per year,this is dumb,lets help reduce the carbon emissions, Nikola Tesla achieved this 100 years ago, we have the technology, and it has to greatly increase profit for business finance facilities,  
<http://www.inventrocorp.co.nz>

## The Market

We bring to the market electromechanical products that benefit all humanity providing a far less cheaper and quicker means of travel, utilizing an energy producing system, that also powers, homes .boats, cars, and the like at less than half the normal consumer cost, I would like to develop a VTOL electric aircraft because of that enormous traffic congestion that you see every day, A first single seater VTOL would be a solution, the martin jet pack is o/k but not great, it needs to be a lot better, i think I have an idea that might work,this market would equate to about 2% of the population  
<http://www.inventrocorp.co.nz>

## Progress/Proof

I have received patents for other products,but could not produce or market due to lack of funds,thats why I'm on this site,  
<http://www.inventrocorp.co.nz>

## Objectives/Future

There needs to be a quicker cheaper safer means of travel,the VTOL aircraft achieves this.along with a more efficient cheaper method to power your home,these are needed NOW,and must be achieved in 2-4 years  
<http://www.inventrocorp.co.nz>

## The Deal

Looking for ¥2,000,000 - Minimum  
¥100,000

We are open to all terms and conditions
